THE
FUTURE
IS
NOW

A person wearing a teal t-shirt is leaning over a table, looking at documents. Their hands are resting on the table near a laptop. To the right, another person's hand in a red sleeve is visible, holding a pen and pointing at a document. The table is covered with various papers, including one with a bar chart. A coffee cup is also on the table. In the background, there is a window with a yellow sticky note and some office equipment.

Auto rebalance

An investment strategy where money really works. We do not need to pay attention to the direction of the market price at all because Rebalance will change every price movement, to be our profit. The more the price fluctuates, the system is more profitable. It will be ruined only when the asset we invest in is equal to 0, which is impossible.

The working principle is very simple, the system will divide our investment into 2 parts and buy 2 different assets to have the same value. The system will create an investment portfolio. "Balanced" Auto Rebalance system will begin to "balance" the port by Transfer asset value existing back and forth sell excess go buy the missing part. There is a process of selling high, buying cheap, endless loop, we call this process Rebalancing.
